

GOUTHAM KONDETI

Clinical Informatics Analyst | EHR Implementation and Healthcare Data

goutham.kondeti@gmail.com | [\(720\) 742-6576](tel:7207426576) | [Chicago, IL](#) | [linkedin.com/in/goutham-kondeti](https://www.linkedin.com/in/goutham-kondeti) | <https://github.com/Goutham-Kondeti>

PROFESSIONAL SUMMARY

PharmD and Master of Science in Health Informatics graduate with 6+ years of healthcare experience spanning clinical informatics, EHR and safety-system workflows, clinical quality measurement, data migration, UAT, and data validation. Experienced in translating clinical and operational requirements into system, data, and workflow specifications; coordinating with vendors and IT teams; and supporting healthcare applications across ambulatory, hospital, and pharmacovigilance environments. Skilled in OfficeMate, Barti, Epic, Cerner, SQL Server, Advanced Excel, Power BI, workflow analysis, data mapping, medical-device integration, and revenue-cycle workflows.

CORE SKILLS

Clinical Systems and Workflows: EHR/EMR, OfficeMate, Barti, Epic, Cerner, Patient Intake, Scheduling, Clinical Documentation, ICD-10, CPT, Insurance Eligibility, Billing Workflows

Implementation and Analysis: Requirements Gathering, Workflow Analysis, Gap Analysis, Data Mapping, Data Migration, UAT, Issue Tracking, Vendor Coordination, SOP Development

Data and Reporting: SQL Server, SSMS, SQL, Advanced Excel, XLOOKUP, Power Query, Power BI, VBA, Data Cleansing, Reconciliation, Validation

Integration and Support: Topcon KR-8800, CV-5000, NIDEK, Network File Transfers, Shared Folders, Cloud Synchronization, System Troubleshooting

Healthcare and Quality: Clinical Quality Measures, Sepsis, Stroke, VTE, Medical Information, Pharmacovigilance, Good Documentation Practices, CAPA

PROFESSIONAL EXPERIENCE

Clinical Informatics Analyst | Village Eyecare – Chicago, IL | Jan 2026 – May 2026

- Reviewed patient intake, scheduling, clinical documentation, ICD-10, CPT, insurance, billing, and operational workflows in OfficeMate and Barti and identified missing fields critical to clinic operations.
- Worked with the Barti team to assess possible changes, configuration limitations, technical challenges, and delivery timelines, including changes that could affect all clients.
- Extracted OfficeMate data through reports, administrative exports, and SQL Server Management Studio and mapped source fields to Barti onboarding templates.
- Cleaned, standardized, consolidated, reconciled, and validated more than 100,000 inventory records across multiple clinic locations using XLOOKUP, TRIM, CLEAN, VALUE, duplicate checks, and SQL queries.
- Reviewed OfficeMate and Barti configuration differences involving product identifiers, pricing, optical attributes, inventory structure, and multi-location requirements.
- Integrated Topcon KR-8800, CV-5000, and NIDEK ophthalmic devices by testing local and network workflows, shared-folder access, file transfers, and Barti import requirements.
- Reviewed insurance eligibility workflows using TriZetto, A2B Verify, and Anagram and identified process gaps affecting eligibility verification, coding, and billing.
- Compared Solutionreach and Barti appointment-request workflows and reviewed VOIP and centralized call-routing requirements.
- Evaluated options for maintaining access to OfficeMate after Barti migration so the clinic could work outstanding claims, reimbursement issues, and historical patient records.
- Coordinated with OfficeMate, Netgain, Barti, clinic leadership, and IT teams on SQL Server hosting, backups, access, system requirements, risks, open issues, and migration timelines.

Senior Pharmacovigilance Associate | Ergomed – Mumbai, India | Apr 2024 – Jul 2024

- Reviewed safety-system workflows, source documentation, case priorities, reconciliation results, and data-quality issues in Oracle Argus Safety across drug, cosmetic, and medical-device programs.

Pharmacovigilance Services Analyst | Accenture – Chennai, India | May 2019 – Jul 2023

- Translated pharmacovigilance workflow issues into functional requirements for Argus Safety, LSMV, email intake, E2B, reconciliation, and case-routing improvements.
- Reviewed incidents, enhancements, and change requests, assessed workflow impact, and coordinated system fixes with client and IT teams.
- Created and executed UAT scenarios for configuration changes and enhancements and documented expected results, actual results, evidence, defects, and retesting.
- Supported the Argus-to-LSMV migration through data validation, field mapping, workflow transition, queue setup, cutover, training, and post-migration stabilization.
- Used SQL and PL/SQL knowledge, Excel dashboards, issue trackers, and VBA automation to investigate data and workflow issues and improve operational reporting.

Drug Safety Associate | Bioclinica (Clario) – Mysore, India | Jan 2019 – May 2019

- Used Argus LAM and Veeva Vault to document and review medical information, adverse events, labels, follow-up, and reconciliation workflows.

Auditor | PrimEra Medical Technologies (Prime Healthcare) – Hyderabad, India | Mar 2017 – Aug 2018

- Reviewed patient records in Epic and Cerner and abstracted stroke, VTE, sepsis, myocardial infarction, and immunization data according to clinical quality-measure guidelines.
- Monitored emergency department records for infection, SIRS criteria, organ dysfunction, laboratory findings, antibiotics, hypotension, and IV fluid treatment and escalated incomplete time-sensitive care.
- Worked with IT to define Epic data points for a semi-automated sepsis abstraction tool and performed UAT against clinical workflow requirements.
- Developed SOPs for sepsis, stroke, and VTE abstraction and supported guideline interpretation and workflow standardization.
- Led quality review for six team members across three hospitals and documented errors, corrections, CAPA responses, and follow-up actions.

PROJECTS

Healthcare Data Architecture and ERD Design | SQL, Oracle Data Modeling

Designed conceptual and logical healthcare data models, normalized entities, defined keys and data domains, and aligned security and reporting workflows with pharmacovigilance operations.

NLP-Based Clinical Information Extraction | Python, spaCy, Transformers

Developed workflows to extract structured patient, product, event, and reporter information from synthetic MedWatch and CIOMS documents.

EDUCATION

Governors State University | University Park, IL | Aug 2024 – May 2026

Master of Science in Health Informatics | GPA: 3.95

Andhra University | Visakhapatnam | Nov 2011 – Dec 2017

Doctor of Pharmacy (PharmD)

HONORS

Upsilon Phi Delta Honor Society

Alpha Alpha Alpha (Tri-Alpha) Honor Society

CERTIFICATIONS

Project Management Professional (PMP) | Oracle Argus Safety Administration | OCI 2025 Certified Data Science Professional | Power BI | SQL & PL/SQL | Base SAS
